Your SMART SAFETY Moment

Safety toolkit

There's an app for that.

The online safety toolkit is a resource for postal managers and other employees responsible for completing specific safety tasks. It's used to prepare and manage accident reduction, hazard abatement and program improvement plans. It enables tracking of OSHA citations and employee hazard-report logs. It also includes driver's license verification, safety talks, mail incident reports, program evaluation guides and more.

The toolkit is at *http://safetytoolkit.usps.gov/Home/Home.aspx*.

And that's smart safety.
