

## Safety accountable

Yes you!

Be accountable when it comes to safety. It can prevent injuries as well as build a safety culture. It might be as simple as telling a co-worker to tuck in hoody strings or remove a watch while working on mail processing equipment, or putting out a wet floor sign.

When you promote a safety culture, everyone accepts responsibility for the safety of themselves and others. For one more day everyone goes home to their families without an injury.

And that's smart safety!
