

## Electrical work

It's a powerful plan.

An electrical work plan (EWP) provides guidelines for safely working around electrical hazards and preventing injuries and incidents. It helps guard against dangers such as electric shock and arc flash. EWP policies comply with all electrical safety regulations established by OSHA. Once implemented, each EWP must be evaluated annually.

Compliance with a plan keeps employees safe and reduces potential OSHA fines. Additional EWP information is available in Management Instruction EL-810-2013-5, Electrical Work Plan, and at the Safety Resources page on the Blue intranet.

And that's smart safety!
