

Poison control

Could that be poison?

In case of accidental poisonings, call 1-800-222-1222. You'll be automatically connected — 24 hours a day, seven days a week — to a local poison control center. These centers are staffed by medical professionals, including doctors, nurses and pharmacists, who are specially trained to assist in poisoning emergencies.

Keep the number near all phones. It could help save a life.

And that's smart safety!
