

Grow Your Savings Bank

A health-related issue can strike at any time. When it does, having enough sick leave available in the “bank” to replace income during recovery can give peace of mind.

Sick leave is deposited automatically into your “account” with each paycheck, and there is no limit to the amount that can be carried over from year to year. Saving sick leave could make your family’s financial situation more secure should a health problem prevent you from going to work. It allows you to concentrate on getting better instead of worrying about how you’re going to pay the bills.

Treat sick leave as a future benefit, and it will be there to take care of you when you need it most.

And that’s smart business!
