

## Make Your Case for Business Success

- Does your proposed project cost more than \$1 million?
- A Decision Analysis Report (DAR) Business Case is required to justify the investment.
- Is there a positive financial benefit?
- Is it needed for safety, health or legal requirements?
- Projects between \$1 million and \$5 million are reviewed and approved by the Technology Review Committee. Above \$5 million, the Investment Review Committee — and the Postmaster General — have the final say.

Following this process makes sure that all projects improve the Postal Service's bottom line.

And that's smart business.
