

This Process is a Financial Must-Do

- The Postal Service has a capital freeze exception process and timeline for FY 2021 capital commitments. The Postal Service must ensure all funds for capital investments are reviewed and are:
 - needed for safety and/or health, or legal requirements
 - required to provide service
 - projects that have a high return on investment and positive net cash flow within a short time period

Reviewing capital requests and making sure they meet one of the criteria above is essential.

And it's also smart business.

For more information about the process for capital commitments go to the Capital Investments and Business Analysis site below:
