

Rollaway/Runaway

Avoid the road not taken.

Rollaway/runaway accidents are always preventable. When parking vehicles, drivers must, place the vehicle in parking gear, set the parking brake, curb the wheels, turn off the engine and remove the key. When parking a vehicle uphill, turn the front wheels away from the curb. When parking downhill, turn them into the curb.

Following these steps will eliminate damages and injuries caused when an uncontrolled vehicle hits something or someone.

And that's smart safety!
