

Vehicle Safety

Who's behind the wheel?

USPS motor vehicle safety programs ensure postal employees are qualified and trained to drive the vehicles they use in their daily work. Postal drivers must have valid driver's licenses and acceptable driving records. In addition, postal employees are expected to make sure their vehicles are in good operating order. Conduct daily inspections according to Notice 76, Expanded Vehicle Safety Check. Report any defects using PS Form 4565, Vehicle Repair Tag.

USPS motor vehicle safety programs provide clear policies, promote safety and ensure vehicles are maintained in a safe condition.

And that's smart safety!
