

Personal Headsets

Stay tuned in for safety.

Employees may use personal portable headsets or earbuds only while seated or stationary, and only when using a headset or earbuds won't interfere with performance of duties or constitute a safety or health hazard. Use only approved equipment for noise protection. Don't use headsets or earbuds while walking or driving, or working near moving machinery.

Following these procedures can reduce accidents due to not hearing "it."

And that's smart safety!
