

## Personal Protective Equipment

If there's a change, retrain.

Employees must be retrained on use of personal protective equipment when changes in the workplace or equipment render previous training obsolete. Also retrain employees who require better understanding or improved skills to use the equipment.

Main training documentation in the Learning Management System and include, at a minimum, the employee's name, date of training and training subject.

And that's smart safety!

For additional information or guidance, contact your safety office.
