

## Safety Training

Stay fresh on your safety knowledge.

Regardless of whether you're new to the Postal Service or a longtime employee, frequent safety training is key to keeping your workplace accident and injury free. Training ensures employees are knowledgeable about safety policies and procedures. It also demonstrates management's commitment to providing a safe work environment.

The Learning Management System provides training on a wide range of safety-related topics. You can access the LMS under the MyHR tab on the Blue intranet.

And that's smart safety!

For additional information or guidance, contact your safety office.
