

Street Supervision

How's my driving?

Supervisors conduct driving observations to identify and correct unsafe actions that could cause accidents. PS Form 4584, *Observation of Driving Practices*, is used to improve employee performance at the wheel.

How often are observations conducted?

- Non-career: once per quarter
- Probationary (0-3 months): 30, 60, 80 day evaluations.
- 4-23 months postal experience: once per quarter.
- More than two years postal experience: twice per year.

Driver observations provide an opportunity for supervisors to give recognition for safe driving practices and identify unsafe practices in need of improvement.

And that's smart safety!
