

## Do it Daily

- Just as an apple a day helps keep you healthy, daily reporting of financial activity and stamp accountability is required to measure the health of the organization. A PS Form 1412, Daily Financial Report, is necessary to help monitor, plan and forecast the business needs of the Postal Service. Daily reporting provides transparency to ensure accurate financial statements.
- Daily financial reporting lets the Postal Service handle our financial responsibilities to pay employees, vendors, manage our investment portfolio and operate a successful business.

Daily financial reporting lets USPS know where its finances stand.

And that's smart business.
